

12. A device as claimed in [one of claims 1 to 10,] claim 1, in which said given medium is a fuel for a heat engine, the application of the magnetic field generated enabling said fuel to enhance and improve combustion efficiency.

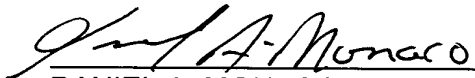

REMARKS

The above amendments are intended to remove multiple dependency within the claims prior to entry into the U.S. national phase.

Applicant hereby requests entry of the above amendment prior to calculation of the filing fee and examination.

Respectfully submitted,

MICHEL RIERA
